SUMMARY

Full-stack developer and AI/ML engineer who ships end-to-end products — from RAG pipelines and course platforms to Docker images, CI/CD, and cloud deployments. Currently a Dev Weekends Fellowship mentee, actively seeking AI/ML engineering roles. Strong in taking projects from prototype to production.

EDUCATION

Bachelor in Information Management (BIM) 2021 – 2025
Shanker Dev Campus, Tribhuvan University — Kathmandu, Nepal

EXPERIENCE

Dev Weekends Fellowship — Mentee 2025 – Present
Remote · Full-stack & DevOps track

- Built and deployed a full-stack LMS with Stripe payments, DRM video, and GCP Cloud Run CI/CD
- Shipped multi-vendor MERN marketplace with Socket.IO realtime and Render deployment
- Containerized backends, configured GitHub Actions pipelines, and resolved production bugs

AI Intern 2024
Industry internship — machine learning & data workflows

- Worked on ML model training, data preprocessing, and deployment workflows

Drupal Developer 2023 – 2024
Custom Drupal module suite in production

- Built and maintained custom Drupal modules for a live production environment

SELECTED PROJECTS

Dev Weekends LMS Live
Next.js 14 · Express/TS · MongoDB · Stripe · Docker · GCP Cloud Run

- Full LMS with course CRUD, DRM-protected video (VdoCipher), Stripe checkout, admin dashboard
- Fixed Stripe hang, cross-site cookie failures, and RTK Query cache race conditions

DocMind — RAG PDF Chatbot Live
PyMuPDF · FAISS · HuggingFace · FastAPI · Mistral · Docker

- Custom RAG pipeline without LangChain — PyMuPDF → MiniLM embeddings → FAISS → Mistral LLM

- Deployed on HuggingFace Spaces; Docker image on Docker Hub

ShopO — Multi-Vendor MERN Marketplace

Shipped

MongoDB · Express · React · Node.js · Socket.IO · Render

- Multi-vendor e-commerce with realtime chat; resolved Mongoose 9, MUI migration, and CORS issues

Insurance Premium Predictor

Live

Python · FastAPI · Scikit-learn · Docker · AWS EC2

- ML regression API for premium prediction; containerized and deployed on AWS EC2
